

DEBUT SERIES

At Odyssey, we recognise the significant contribution that an instrument makes to the willingness of a student to persevere, practice, pursue the process of learning to control and master the instrument, enjoy making music and progress.

Odyssey Debut has been designed by Peter Pollard to be easy blowing, with great tonality and exceptional playability, ensuring those first steps are giant leaps.

Supplied in durable ABS or zero-gravity cases, Odyssey Debut opens the door to becoming an accomplished musician.

Over forty years of experience in designing, building and repairing large scale brass instruments has been invested into the Odyssey Premiere Brass Band range by designer Peter Pollard.

The classic manufacturing techniques necessary to ensure the correct playing feel, the detailed specification to ensure balance and intonation, the subtle nuancing required to produce the hallmark tones of the brass band are all to be found in these beautiful instruments.

Music is an essential part of all our lives. It inspires, entertains, and lifts the soul.

In the hands of capable players, the instruments of the brass and woodwind family spice up rock music, swing with big band, swoop and soar with jazz, proclaim with brass band, and in an orchestral context can shock the heart with the stridency of conflict, shout out joy and celebration or produce mellifluous tones to sooth the listener with a flood of warmth and well-being.

The heart of an instrument is timbre.

Designed by Master Craftsman Peter Pollard, one of the most sought after custom brass and woodwind builders in the world, Odyssey Symphonique™ Series instruments offer levels of specification, finesse, playability and nuanced quality which are essential to experienced professionals.

WOOD BODY PICCOLO OUTFIT

WOOD BODY C FLUTE OUTFIT

For the warm •natural• sound of fine grenadilla wood.

This flute has the carrying power of a silver flute! Which means that the Odyssey wooden flute is suitable not just for solo and chamber music, but also for use in the modern symphony orchestra.

The tone holes are precision-crafted of inset grenadilla which allows wider sized holes like those of metal flutes. This is another factor contributing to the flute's accurate intonation and tonal clarity.
